WEATHER OF CONCERN

Weather of Concern

Northern California:

- Afternoon and evening thunderstorms are expected mainly in the Sierra Nevada through the weekend.
 - Storms will start fairly dry, with new fire starts from lightning possible.
- Chances for thunderstorms will spread into the eastern portion of the Kern County mountains and desert today as deeper monsoonal moisture arrives.

Southern California:

- As the atmosphere moistens today and Thursday, the main threats with thunderstorms will be heavy downpours with possible flash flooding as well as gusty winds.
 - The best threat of thunderstorms during this time will be across the Los Angeles County mountains and Antelope Valley.
 - Slight chance of storms across the Ventura County mountains and San Gabriel Valley

WEATHER SYNOPSIS BY REGION

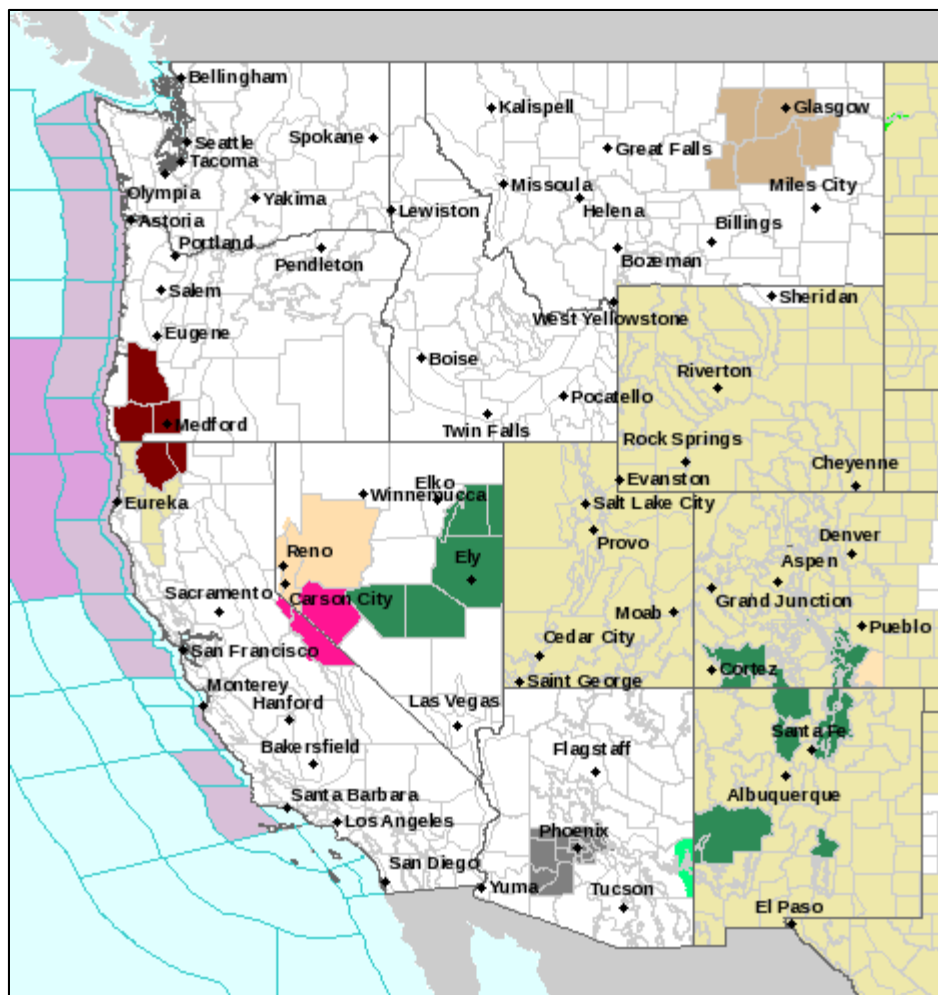

NORTHERN CALIFORNIA

Strong high pressure currently centered east of us will be taking over our weather pattern through the upcoming weekend as it becomes quite established in the 4-Corners area and extends well westward across California. Hot, dry, mostly clear conditions will prevail with the warmest inland areas around 105 each day into the foreseeable future. A bit of moisture will be spreading north later this week, but it remains uncertain how many thunderstorms may develop over Northern California from that. For now, expect a small chance of isolated afternoon and evening mountain thunderstorms developing today onward. They may reach as far north as Hwy 50 today, then they look more possible but wetter over all our mountains Thursday and Friday and just in the north Saturday. Beyond this weekend, thunderstorm details are even more uncertain.

SOUTHERN CALIFORNIA

The airmass will remain quite humid today, which will lead to scattered wet thunderstorms once again across the Sierras and over areas from Los Angeles County south and eastward as well as the deserts south of I-15. Brief heavy rain will be possible from the storms as they propagate westward. Temperatures will remain 5-10 degrees above normal. Winds will remain light except for during the passage of convection. There will be a slightly better chance of storms today due to a deeper surge of moisture slated to reach the deserts during the afternoon. Some convection may continue during the overnight hours tonight into Thursday. The second half of the week and into the weekend, look for a gradual reduction in storms and by Friday, most storms will be confined to the Sierras and high desert. No storms are expected across the central coast southward to Santa Barbara County throughout the period. Temperatures will drop back into the upper 80s and lower 90s in the valleys by the weekend as onshore flow resumes.
